

HOT NEW PRODUCTS

From the desk of Dave Stokoe

I know that everyone's schedules are hectic and it is impossible to keep up on the newest technology. This bulletin will highlight a couple of the new products for you.

I am happy to announce that we were the first company to sell the WJ-ND400 in Canada.

The other featured product is the WVNF302, a versatile new camera made by Panasonic.

I look forward to meeting all of your CCTV needs. Please call me if you are interested in learning more about any of the products we carry.

Sincerely,

Dave Stokoe

The i-Pro WJ-ND400 NVR can record up to 64 network cameras simultaneously with multi-format recording in MPEG-4 and JPEG to deliver recording performance on par with today's high resolution IP cameras. Metadata associated VMD provides fast, effective search. The WJ-ND400 offers 2x and 4x digital zoom on live or recorded video, Panasonic camera control for pan/tilt, zoom, focus, brightness, preset position and auto mode, with quick IP setup for Panasonic i-Pro network cameras. Up to 9 hot-plug hard disk drives can be installed for maximum on-board storage capabilities, and up to 16 clients can monitor and control the WJ-ND400 simultaneously. Eight recording programs can be set for each individual camera, with camera assignment of 1 to 8 groups for easy browsing. Multiple display modes and flexible playback controls facilitate monitoring of images. An embedded real-time operating system offers supreme reliability, while RAID5/6 provides redundant recording for data security.

WVNF302

Metal Body Day/Night Fixed Dome Network Camera featuring a 1.3 Megapixel CCD for superior image

Superior image of 1,280 x 960 pixels, enhancing its identification capability

- MPEG-4/JPEG digital signal output at VGA image size with up to 30 ips
- MPEG-4 and JPEG dual stream output for simultaneous real time monitoring and high resolution recording
- ABS (Adaptive Black Stretch) increases visibility of subjects in dark areas.
